

What's a Skill Builder?

For those families new to middle school, Skill Builders are a worksheet assigned weekly with review problems to keep previous math content fresh in students' brains as we continue on with new content. A few key things to note about Skill Builders:

- They are assigned on Friday and are due the following Friday (7 days later) at the beginning of class.
- They are graded on ACCURACY, so every question counts. Remind your student to read and follow directions carefully!
- They are not accepted late. They can be turned in ahead of time if needed. If a student is absent on Friday, it is due the following Monday.
- You can always find a PDF copy in Google Classroom in case they are misplaced.
- They are NOT a test; students can get help on them if needed. If your student wants to work with me or get their Skill Builder checked ahead of time, they can join me during lunch! :)
- I drop (don't include in their grade) their lowest Skill Builder score. So if a student doesn't complete it or forgets it at home, no worries. This allows each student to have an "oops" moment without penalty. :)
